January, 2021

John F. Carroll
Principal

Dear Parents/Guardians of a Sophomore Student:

As part of our academic programming at Centerville High School, Career Technical Education (CTE) programs are available to junior and senior students. Upon successful completion of these programs, each student will earn a \$3,000 scholarship to Sinclair Community College. College credits may be earned while taking several of these programs. Advanced Placement or Honors classes may also be taken, when in a CTE program.

On Wednesday, January 20th: All sophomore students (and their parents/guardians) will have an opportunity to learn more about our Career Technical Education offerings at CHS. Students will access the Career Education EXPO Google classroom. There will be 3 videos for sophomore students to view. The videos include information from current CHS students, an introductory video about the 12 programs at CHS and the process to apply to one or more of the programs.

On Wednesday, January 27th: All sophomore students (and their parents/guardians) will be able to learn more about the 12 Career Technical Education programs at CHS by visiting the Career Tech Education EXPO website at: www.tinyUrl.com/CHSExpo2021. This website will have a video explaining the benefits of Career Tech Education as well as videos from each individual program. Centerville has 12 CTE programs on our campus at CHS and Kettering Fairmont has 7 CTE programs available on their campus.

These videos will help provide input on your son's or daughter's pathway for the final two years of high school and you will have the opportunity to learn more about our teachers and their classes. This will also help make the upcoming parent conferences more meaningful and productive. Please view the videos on these two dates.

Respectfully,

John Carroll
Coordinating Principal

Craig Suttman
Career Education Director

For information on our programs, go to the Centerville High School webpage at www.centerville.k12.oh.us/schools/chs/career-tech
